# AN EXCLUSIVE TECHNOLOGY FOR CUTTING EDGE LUBRICANTS

## THE MICROLAMELLAR STRUCTURE

The ceramic microparticles contained in Svitol Bike lubricants settle on the metal surface ensuring maximum adhesion and adaptation to the micro-roughness of the surface. They have a microlamellar molecular structure: the planes formed by their molecules remain parallel and without any chemical bond between them, so as to slide one over the other, ensuring lubrication.

## THE ADVANTAGES OF NEW CERAMIC ADDITIVES

Ceramic additives are the technological evolution of PTFE additives: they maintain all of the qualities of their predecessors, but with numerous additional advantages.

	PTFE	CERAMIC	ADVANTAGES
Thermal and chemical stability	2	5	It maintains the properties unaltered over time
Adhesion on metal	1	3	Greater efficacy
Electric Insulator	5	5	It protects against corrosion as required for E-Bikes
Thermal conductivity	1	5	Improved dissipation of heat due to friction, ideal for E-Bikes
Microfine particle size*	2	4	Improved penetrating capacity into the nooks of the metal surface
Anti-adhesive, lubricating capacity	5	5	It aids lubrication

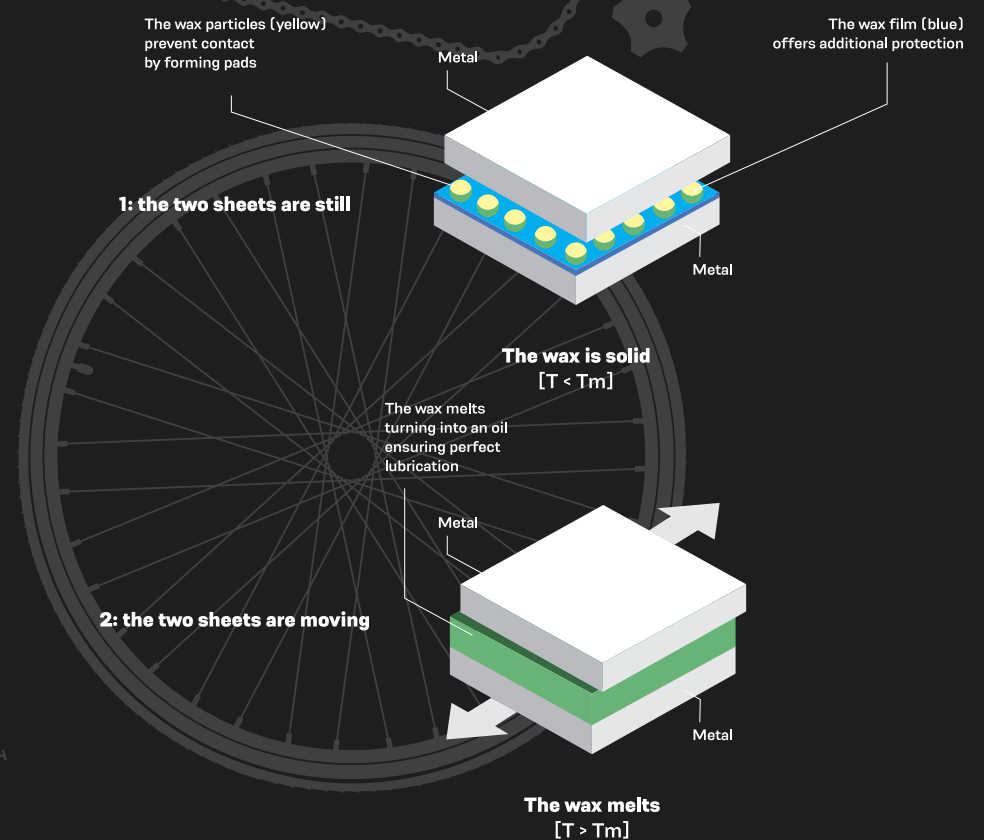

\*microfine PTFE particle size is generally: 90% < 6um, with an average of 3um ceramic particles have an average size of 2um; more than 90% < 4um; 10% size < 0.9um

# THE NEW BIKE LINE

## SOLID TO LIQUID (STL) TECHNOLOGY

Once the solvent has evaporated, a solid, non-sticky, clean and weather-resistant lubricating film is formed. The solid only liquefies in the point where two planes rub together.

# THE FULL RANGE FOR BIKE MAINTENANCE

# BIKE

## DETERGENT

### WHAT IT IS DESIGNED FOR

Its alkaline formula has been designed to effectively, quickly and safely clean every part of the bike, which will be spotless and shiny.

As a matter of fact, it contains a polymeric additive that removes hard water elements (magnesium and calcium) as well as smog and dust contaminants (iron, zinc and heavy metals), thus making the detergent more effective in cleaning and rinsing, preventing contaminants from building up on the treated surface again, and contributing to reinforcing the typical brightening effect of this product.

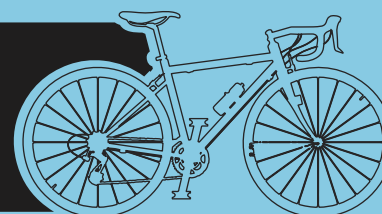

**SVITOL BIKE DETERGENT** effectively removes all types of dirt, even the most resistant: encrustations, dust, mud, smog, grease and oil. Its formulation is designed to be safe on all bike materials such as carbon, aluminium, steel, painted or anodised and rubber surfaces.

### PLUS

- **Effective, quick and safe cleaning of every part of the bike.**
- **Shiny effect.**
- **Safe on all bike materials.**
- **Suitable for E-bikes as well.**

## SUPER DEGREASER

DUAL DISPENSING SMART CAP

### WHAT IT IS DESIGNED FOR

As a result of its solvent-based formulation, it not only quickly removes grease, oil, dust, tar and dirt, but also reduces wear. Designed with a dry degreasing technology, it leaves no residue and does not require rinsing with water, as it simply evaporates leaving the treated surface completely clean thanks to the purity and quality of the raw materials. The evaporation speed is modulated to allow for deep action, also with the aid of specific brushes and tools.

Safe on all components of the bike transmission unit: chain, rear sprockets, pinions, shifters and front derailleur.

Waterless degreasing: also ideal for E-Bikes.

100% ACTIVE PRODUCT – ALL-ROUND DISPENSING.

### PLUS

- Quick action without any residue.
- No rinsing required.
- Ideal for E-bikes as well.

## DISC BRAKE DETERGENT

WHAT IT IS  
DESIGNED  
FOR

Thanks to powerful and precise dispensing it removes dirt, grease, brake fluid and oil residues from brake discs and pads. It removes grease in depth, improving braking performance. It helps prevent brakes from squealing, ensuring better efficiency and duration of the entire braking system.

100% ACTIVE PRODUCT - IT EVEN DISPENSES UPSIDE DOWN.

**For light dirt:** dispense generously on the bike disc brake. Let it drain and remove any excess with a soft cloth, let dry.

**For stubborn dirt:** spray a generous amount of product and rub with a cloth to remove the dirt. Dispense plenty of product again, remove any excess product by drying the brake with a soft cloth. Finally, let dry.

## CHAIN LUBRICANT

DUAL DISPENSING SMART CAP

### WHAT IT IS DESIGNED FOR

As a result of its modern formulation based on highly pure synthetic lubricants with additives of ceramic micro flakes, it can penetrate into and adhere perfectly to the micro roughness of the metal surface, making it an ideal product to guarantee long-lasting lubrication in all environmental conditions (dry or humid). The product leaves a lubricating film on the bike chain that prevents and reduces wear while ensuring an excellent protective action against corrosion and dirt.

**Ideal for chain, transmission, derailleurs, pinion pack, cables and levers.**

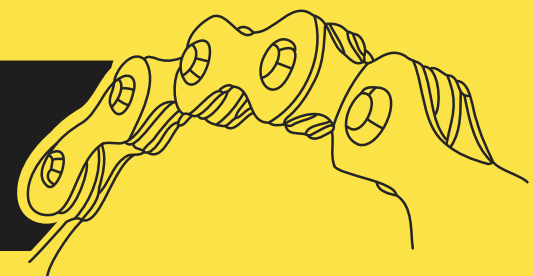

The excellent lubricating capacity, provided by the ceramic and EP additives, guarantees the best lubrication of the chain and pedal assistance system, even in harsh conditions, and makes SVITOL BIKE CHAIN LUBRICANT ideal for E-Bikes as well.

250ML

### PLUS

- Excellent lubrication in all weather conditions.
- Additive with ceramic microparticles.
- Ideal for E-bikes as well.

# BIKE

## DRY CHAIN LUBRICANT

Its modern formulation with ceramic additives, based on a balanced blend of waxes, synthetic oils and solvents, is designed to guarantee clean, long-lasting lubrication over long distances in dry and dusty conditions. Unlike lubricants with PTFE flakes, the ceramic microparticles are much smaller in size, thus adhering to and penetrating into the micro roughness of the metal surface, as well as forming a compact, uniform and particularly resistant barrier against wear, dust, dirt and oxidising agents. Once the solvent has evaporated, a solid, non-sticky, clean and weather-resistant lubricating film is formed, which liquefies only where there is rubbing. **Ideal for chain, transmission, derailleurs, pinion pack, cables and levers.** The excellent lubricating capacity, provided by the most cutting-edge ceramic and EP additives, guarantees top performance of the bike chain, making **SVITOL BIKE DRY CHAIN LUBRICANT** the perfect solution for E-Bikes as well.

## WET CHAIN LUBRICANT

Its modern formulation with ceramic additives has been designed to have the highest resistance to washout, so as to guarantee longer-lasting lubrication and excellent anti-wear properties even under the most extreme, humid and muddy conditions.

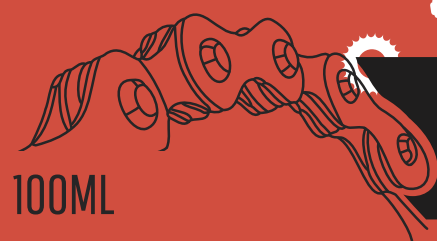

**SVITOL BIKE WET CHAIN LUBRICANT** exploits microscopic high-penetration ceramic flakes that create a uniform, resistant film on treated surfaces and guarantee long-lasting lubrication. Particularly tough, the flakes form a compact and uniform barrier against water, dirt and oxidising agents.

**Ideal for chain, transmission, derailleurs, pinion pack, cables and levers.**

What is more, the excellent lubricating capacity, provided by ceramic and EP additives, guarantees the best performance of the chain and pedal assistance system, even in harsh conditions, and makes **SVITOL BIKE WET CHAIN LUBRICANT** ideal for E-Bikes as well.

## PLUS

- Clean, long-lasting, long-distance lubrication in dry and dusty conditions.
- Additive with ceramic microparticles.
- Ideal for E-bikes as well.

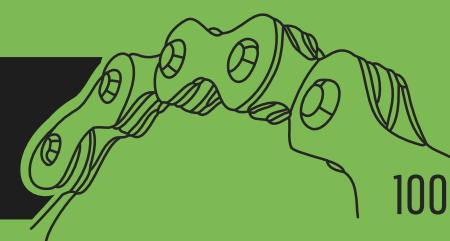

100ML

## PLUS

- It guarantees longer lasting lubrication and ensures excellent anti-wear properties even under the most extreme, humid and muddy conditions.
- Additive with ceramic microparticles.
- Ideal for E-bikes as well.

## TYRES INFLATION AND REPAIR

WHAT IT IS  
DESIGNED  
FOR

Specific product to instantly repair and inflate any type of tyre, with or without an inner tube, without taking off the wheel. It goes deep into the tyre, forming a stable and long-lasting sealing film, which ensures an effective repair, making it possible to safely reach the closest repair centre. It re-establishes the correct tyre pressure.

The can features a dual connector compatible with Schrader, Presta, Dunlop/Woods and Regina valves. The product repairs tyres up to 29".

NEW

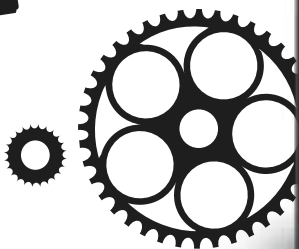

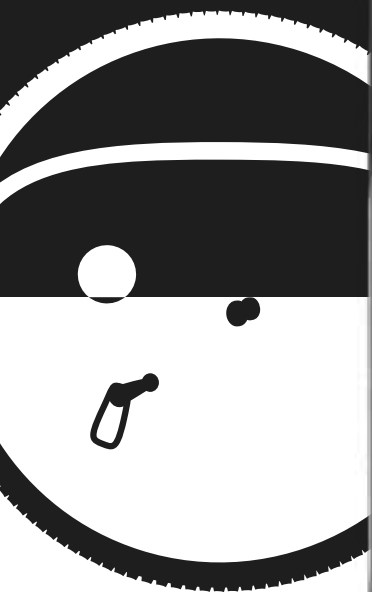

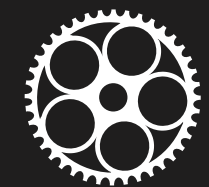

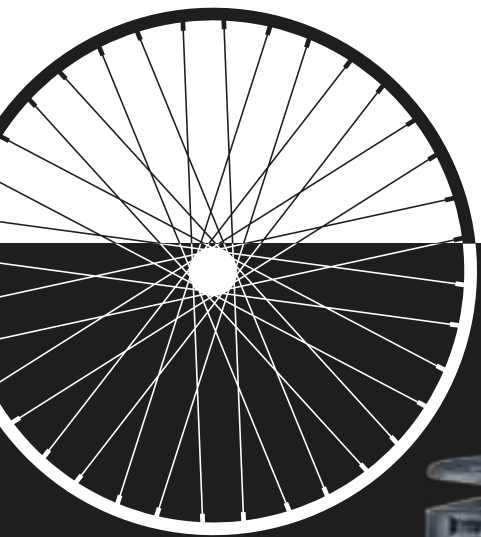

100 ml

PLUS

- Instantly repairs and inflates.
- Compatible with the main valves.
- Easy to use.

SELF-DISPLAY PACK  
OF 12 PIECES
